FREE WEBINAR

Building the Smart Grid Digital Transformation in Modern Power Networks

As power networks go digital, smart grid technologies are changing how electricity is generated, delivered and consumed. This session introduces the fundamentals of the smart grid, explains how advanced metering infrastructure enables two-way communication between utilities and consumers, and examines the cybersecurity considerations that come with connected, data-driven grid operations.

DETAILS

ORGANIZED BY
Smart Grid Research Laboratory (SGRL), CPRI, Bengaluru

DATE
Tuesday, Dec 15, 2026
2:00 PM – 5:30 PM IST

TOPICS COVERED

- Cybersecurity in smart grid
- Advanced metering infrastructure
- Fundamentals of smart grid

AUDIENCE
Utility & OT engineers
Risk, IT/OT security teams
