11th INTERNATIONAL CONFERENCE ON POWER CABLES

10th and 11th FEBRUARY 2022

Organized by,
**CABLES AND DIAGNOSTICS DIVISION
CENTRAL POWER RESEARCH INSTITUTE
BENGALURU, INDIA.**

About CPRI

Central Power Research Institute (CPRI) is the power house of the Indian electrical industry. Set up in 1960 by the Government of India, it functions as a center for applied research in electrical power engineering assisting the electrical industry in product development and quality assurance. CPRI also serves as an independent authority for testing and certification of power equipment of specialization.

Conference

Underground power cables are becoming more and more prominent in transmission and distribution sector , with increased power demand and scarcity of space for overhead lines. Further, the need for HVDC cables for long distance transmission is also increasing. However, there are lot of challenges in connection with condition monitoring of the cable system in service, & development of Nano dielectrics for enhanced electrical properties for high current long transmission cables. With advancement in technology, new measurement techniques and computerized analytical techniques are also in place for better maintenance of power cable system. The conference will provide an overview of all the elements that are of interest, in connection with safe and reliable cable transmission and distribution system with special attention to new materials. As with previous conferences the programme will have plenary and technical sessions. Since 1983, CABLETECH has brought together Engineers, Scientists, manufacturers and Regulators from around the globe to hear the latest state of art technology. This conference will provide a common platform for all stake holders to network with their peers to exchange ideas and developing new ones.

Who Should Attend
